SF-32A
Automatic Paper Folder

Product Introduction

SF-32A Automatic Air Suction Folder
The SUNFUNG SF-32A is a compact automatic air suction folder designed for digital print shops, copy centres and professional print finishing environments. Its top-feed vacuum system provides reliable sheet separation and smooth feeding across a wide range of stocks, including coated paper.
With a production speed of up to 10,000 sheets per hour, the SF-32A combines a 7-inch touchscreen, automatic fold-plate positioning and double -sheet detection for quick setup and consistent operation. It handles sheets up to SRA3 (345 × 500 mm) and supports multiple fold styles, making it a flexible and productive solution for everyday short- to medium-run folding applications.

Technical Parameters

Model	SF-32A
Min paper size	120 x 180mm
Max paper size	345 x 500mm
Max paper thickness	180gsm. 260gsm for half fold
Min paper thickness	60gsm
